## **Executive summary**

This document is the communication and dissemination plan for the H2020 project TAILOR. The objective of this plan is to outline the main strategy for communication and dissemination activities, and to provide an overview of the communication and dissemination objectives, tools and planned activities.

The plan will be used for everyday management of communication activities, as well as guidance and information to anyone interested in these topics. It will be updated twice yearly, or as necessary, during the project duration.

## Background

## The TAILOR project

The purpose of TAILOR is to build the capacity of providing the scientific foundations for Trustworthy AI in Europe by developing a network of research excellence centres leveraging and combining learning, optimization and reasoning.

TAILOR is addressing technological issues, community building, innovation concerns and societal issues. The project is implemented through a set of specific instruments, namely:

- the establishment of a network of centres of excellence in Al;
- the development of a strategic research and innovation roadmap for the foundations of Trustworthy AI;
- the execution of a technical research agenda based on major technological challenges;
- the implementation of an innovation and transfer programme driving a deep collaboration with industry;
- the establishment and management of a connectivity fund for the purpose of integrating the European AI community around the theme of fundamental underpinnings of Trustworthy AI;
- the organization of events meant to inform policy makers and the general public toward Trustworthy AI (but also on AI in general) to increase awareness and boost the definition of policies that support the uptake of AI technologies.

#### Strategy

Two important roadblocks need to be lifted to put effective networks in operation:

- Identifying emerging trends and new societal, ethical and industrial challenges in the complex field of AI is difficult. Even more complicated is the continued synthesis of these strands into a coherent and prioritized scientific and technical picture that takes advantage of existing assets. How can we design and effectively maintain a European strategic research and innovation roadmap for the foundations of Trustworthy AI?
- The current scientific landscape in AI is fragmented, not only because of different perspectives on AI (such as learning vs reasoning) but also because many research groups work individually or in smaller constellations in relatively isolated scientific communities thereby drastically reducing the capacity for AI research in Europe and failing to get visibility. Bringing together various communities and ecosystems – engaging with citizens and scientists, across geographies, maturity levels, and disciplines – is necessary to reduce fragmentation and effectively use resources. How can we remove the borders between the different subcommunities in AI and bring these communities together to work on identifying and tackling the key open problems in AI?

#### Objectives

The expected outcome of the TAILOR project is a strong academic-public-industrial research network with the capacity of providing the scientific basis for Trustworthy AI. The network will be based on a number of innovative state-of-the-art mechanisms. A multi-stakeholder strategic research and innovation research roadmap continually collecting and monitoring the scientific research challenges to achieve Trustworthy AI which coordinates and guides the research in the network. A basic research program forming virtual research environments with many of the best AI researchers in Europe addressing the major scientific challenges and identified in the roadmap with a technical focus on integrating learning, optimisation and reasoning. The research program is divided into five themes: Trustworthy AI, AI Paradigms & Representations, Acting, Social, and AutoAI. A collection of mechanisms supporting innovation, commercialization and knowledge transfer to industry such as thematic workshops, industrial PhD students and joint academic-industrial research

labs building on a few representative companies and large research institutes with strong connections to many different application domains and companies. A collection of mechanisms supporting effective collaboration within the network such as a AI- Powered Collaboration Tools, PhD program, and training programs. A connectivity fund to support active dissemination across Europe through for example research visits and joint workshops allowing the network to grow and to support the scientific stepping up of more research groups.

The project's consortium is committed to demonstrate that research and innovation based on expertise, cooperation, and diversity can achieve the European vision of Human-Centered Trustworthy AI and make Europe the global role-model for responsible AI.

#### Network

The main TAILOR instrument is the network consisting of the 54 partners and at least 60 additional network members organized into 5 virtual research environments guided by a strategic research and innovation roadmap and verified through industrial use-cases.

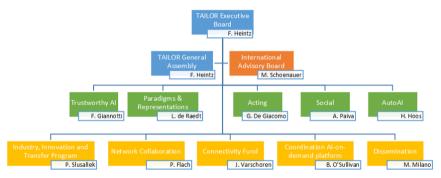

Figure 4.1 TAILOR Organization

## Key Messages

The main messages that we need to convey in our dissemination and communication are the following:

• TAILOR is committed to develop the scientific foundations of Trustworthy AI.

- TAILOR strongly believes that it is necessary to combine techniques from learning, optimisation and reasoning to provide trustworthy AI.
- TAILOR will make key technical advancements to achieve the European vision of human-centered trustworthy AI.
- TAILOR will increase the AI research capacity of Europe by developing a network of research excellence centres leveraging and combining learning, optimisation and reasoning.

## **Dissemination and communication in TAILOR**

The dissemination of project results into new knowledge, products, and exploitation in general are key indicators for project success. The elaboration of a dissemination strategy, a concrete plan, and the management of related activities will be the focus of Work Package (WP) 12 (Dissemination and Outreach) in the TAILOR project. UNIBO as WP12 leader defines the main guidelines for a high impact communication strategy in close collaboration with the other partners.

The main objectives of the TAILOR dissemination plan will be to:

- 1. strengthen the vision and results of the project on a large scale;
- 2. seed the formation of instruments and groups to support long-term visibility of scientific results and tools related to Trustworthy Al.

The strategy is articulated along two different dimensions, and in particular: <u>"Who"</u>: Identification of target groups, their needs and interests, and definition of their connection with Trustworthy AI (e.g., as a research topic, a mean to strengthen business operations, as a main business area, or as mean to ensure fairer and ethical AI-powered public services).

<u>"How"</u>: Definition of actions and instruments designed to reach the target groups, including (for example) the selection of conferences and journals, B2B and R2B events, and media. Production and management of centralized resources related to the topic of Trustworthy AI.

Our dissemination activities can be broadly grouped into the following classes, namely:

- preparation and management of on-line resources;
- publications and presentations, both in scientific conferences and workshops and also in informal internal meetings of the TAILOR project fostering networking and collaboration between people and labs;
- liaison activities with other projects and related European and national AI initiatives;
- organization of events directed toward policy makers informing them on AI in Europe and its strategic directions, together with VISION and CLAIRE, who have already experience in these settings;
- organization of events directed toward industry informing them on the practical guidelines for implementing trustworthy solutions;

 organization of events directed toward the general public to increase awareness, together with VISION and CLAIRE, who have already experience in these settings;

• organization of and participation in scientific events related to Trustworthy AI. The planned actions are meant to increase awareness and showcase the project results and highlight their practical applicability, potential economic/policy impact, with particular attention on seeding the formation of resources and initiatives related to Trustworthy AI that could last beyond the project duration. Some of the actions described are tightly connected to similar communication activities, which will be discussed in more detail in Section 4 – External Communication Plan.

## Internal communication

## Communication objectives

- Researchers in all work packages have access to necessary information regarding work performed in other work packages that may be of importance to their own work
- All project workers have access to information and guidance related to the project's contractual and financial questions
- Project management (coordinator and executive board) have updated information from all work packages in sufficient quantity and quality to allow for strategic management of the project.
- All project workers receive timely reminders regarding major events, deliverables and reporting procedures.

## Target groups

- Researchers in all WP:s
- WP leaders
- Project management

### Tools

- Newsletter
- EB meetings
- Open WP meetings
- Internal file storage (Google drive)
- Direct mail
- Mailing groups
- Yearly meetings ("TAILOR conference")
- Mattermost

#### Other Communication Tools

• The primary mode for communication is **e-mail**. Open email groups on Google Drive have been created for all WPs. These groups are open to all

individuals involved or interested in the TAILOR project, by request to the group manager.

- TAILOR will benefit from a private *team* on the Mattermost platform that is being set up by Inria for the European AI community, and is offered by VISION and CLAIRE. Within this team, TAILOR will open different channels, private or public, under the responsibility of communication managers. Importantly, some channels will also be open to whoever has a login on this Mattermost platform, allowing wide communication among the whole European AI community independently of the entity (network, association, ...) s/he belongs to.
- Meetings are mainly held on **digital platforms**. The project as such provides no tool for digital meetings. The most used digital platforms used so far by project partners have been Zoom and Google Meet.
- The **Google Drive** platform provides a valuable tool to share information and comments, to work on documents, and to keep track of progress. Particularly, a **Project handbook** is provided as a tool for all involved in the project, a convenient means to find the information needed on a day-to-day basis when working in this project. It is a live document, and it can be revised and improved when needed, to always reflect the ways that the consortium choses to work and collaborate.

## **External communication and dissemination**

## Objectives

The objectives of the external communication and dissemination (C&D) can be deduced from the funding agency's and the project's objectives, and measured by the associated KPI:s as defined in the Grant Agreement:

| Project objectives                 | C&D objectives                    |
|------------------------------------|-----------------------------------|
| 1. Establish a strong pan-European | Establish the TAILOR Network as a |
| network of research excellence     | brand of excellency               |
| centres on the Foundations of      | Assure information flow between   |
| Trustworthy Al                     | research groups on common         |
|                                    | activities                        |

#### Table 1. C& D objectives

|                                                                                                                                                                         | <ul> <li>Increase number of members in the network</li> <li>Assure participation from all European countries</li> </ul>                                       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ol> <li>Define and maintain a unified<br/>strategic research and innovation<br/>roadmap (SRIR) for the<br/>Foundations of Trustworthy AI</li> </ol>                    | <ul> <li>Promote participation to SRIR<br/>workshops and writing sessions</li> <li>Distribute and promote the SRIR to<br/>relevant stakeholders</li> </ul>    |
| <ol> <li>Create the capacity and critical<br/>mass to develop the scientific<br/>foundations for Trustworthy AI</li> </ol>                                              | <ul> <li>Facilitate publication of results from<br/>the TAILOR project</li> <li>Promote research visits</li> </ul>                                            |
| <ol> <li>Progress the Scientific State-of-<br/>the-Art for the Foundations of<br/>Trustworthy AI</li> </ol>                                                             | <ul> <li>Promote leading TAILOR scientific<br/>publications</li> </ul>                                                                                        |
| <ol> <li>Build sustained collaborations with<br/>academic, industrial, governmental,<br/>and community stakeholders on<br/>the Foundations of Trustworthy AI</li> </ol> | <ul> <li>Promote events such as TDW</li> <li>Promote possibilities for<br/>collaboration with industry to the<br/>academic partners and vice versa</li> </ul> |
| <ol> <li>Increase Knowledge and<br/>Awareness of the Foundations of<br/>Trustworthy AI across Europe</li> </ol>                                                         | <ul> <li>Contribute content to the AI4EU<br/>platform</li> </ul>                                                                                              |

## Target groups

Our communication and dissemination efforts are focused on ensuring effective communication with industrial and public actors, on stakeholder engagement (e.g., for the definition of requirements and use cases), and on maximizing the visibility of results and tools, and training resources related to Trustworthy AI.

In addition to the AI on demand platform engagement supported by TAILOR within the WP11, it is key importance to provide a good linkage with other Networks of Excellence created through the VISION Coordination and Support Action. This is illustrated in the figure below, where VISION acts as a channel of communication for TAILOR with respect to the different target groups that TAILOR focuses on.

Figure 1. Networks of Excellence, ICT48 call

- The broad <u>AI scientific community</u>, as a major source of contributions on the topic of trustworthy AI and one of the main actors to which the Strategic and Innovation Roadmap will be addressed. More in detail, we will plan dissemination actions directed at major AI conferences, research associations and discussion groups, other projects, and local research networks of each partner. In addition an effective and fruitful collaboration with the main European initiatives is crucial: we aim to connect through VISION with the other Network of Excellence funded by the Commission under the ICT-48 call; we aim to connect with the AI4EU project devoted to design and implement the AI-on-demand platform and the follow up projects funded by the Commission under the ICT-49 call; last but not least the AI, data and robotics PPP that is currently developed to aggregate the public and private stakeholders.
- Scientific Al associations, that are very active in Europe and form the backbone for AI research. These are CLAIRE, the Confederation of Laboratories on Artificial Intelligence Research in Europe, ELLIS European Laboratory for Learning and Intelligent Systems and EurAI, the European Association of Artificial Intelligence, an umbrella association that puts together all national AI associations. TAILOR will engage with these associations and their networks of researchers and industries.
- The **<u>education sector</u>**, which will be crucial to raise the next generation of AI talents and should therefore be kept aware of developments and current

research directions in Trustworthy AI. We plan to aim our efforts at higher education institutions, including the institutions of the academic partners of the TAILOR project. We also plan dissemination activities addressed directly at undergraduate and graduate students. TAILOR, in collaboration with other networks, with TAILOR, CLAIRE and EurAI, will organize summer schools that are attractive to the best young talent in our network and beyond. These schools will be properly advertised to reach out the largest possible audience at European level. TAILOR will also organize challenges and hackathons, very popular amongst young computer scientists, and open to all: young talents should be better prepared to face, and create trustworthy AI systems for, realworld problems. These challenges and hackathons need to be strongly supported by a communication mechanism that is meant to reach AI researchers and developers.

- <u>Business actors</u>, as potential beneficiaries of trustworthy AI, users of the related tools, and providers for requirements and priorities. This group includes large companies, SMEs, spin-offs and start-ups, but also industrial associations and standardization bodies. This will be achieved by connecting mainly to the Digital Innovation Hubs that are connected to AI. These DiH are connected through an ICT-49 project, whose coordinator (PwC) is part of VISION, with which TAILOR will connect. The AI alliance is also a good channel for distributing the results of TAILOR and the opportunities provided by open calls. Finally the PPP on AI, data and robotics will be a strategic initiative of the commission for AI and will involve the key industrial players in AI. TAILOR will have good connections with the PPP, as CLAIRE and EurAI are two of the five partner organizations establishing the PPP.
- **Public stakeholders**, such as public administrations at different levels, legislative/ regulatory discussion groups and associations and the policy-making groups with the EU and member states. Also for these stakeholders we need to identify proper communication channels.
- **General public**, to increase engagement and awareness on AI in general we need to identify proper events and specific formats aimed at informing the general public on the use of AI. CLAIRE and EurAI, which are both closely connected to TAILOR, are also trustees and partners of AIHub, a global organization that has this as its core mission.

In the table below the project's specific audience are introduced:

Table 2. Target groups and channels

## Tools

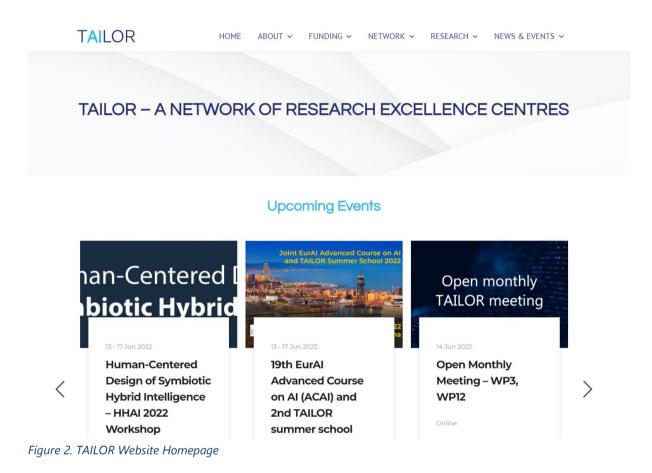

All networks of excellence are connected through VISION that will set up crossnetwork communications as one of its key activities. TAILOR will leverage this opportunity also to communicate outside the project boundaries.

#### Website

#### Content and updates

The website is built using Wordpress and Divi, and hosted on a server belonging to Linköping University and located in Linköping, Sweden. The site will be maintained and updated regularly and will be active, but not updated, for at least 3 years after the end of the project.

#### **TAILOR Website Homepage**

#### Website structure and navigation

The website is a modern website, based on mainly dynamic content. The **dynamic content** is visible on several places on the website. Visibility depends on categories, dates and tags. For example, when publishing a text on the latest AI challenge, the text is visible on at least 4 places (depending on context/subject): the "news" section on the landing page, the "News" page, the "WP2" page and the "Challenges" page. The static content allows for structuring the pages. Navigation is based on the Homepage (Figure 1) and 5 navigation headlines (About, Network, Research, Activities, Contact), grouping primary and secondary pages. The navigation headlines do not correspond to pages (they are not clickable). An efficient search function is implemented and available for users who are looking for something specific. Pages and subpages are listed in Table 1, and an overview on how these are structured from a user perspective is available in Figure 3. Nodes are further described in Table 2.

Table 3. List of all static pages on www.tailor-network.eu

| Primary page                    | Secondary page(s) (if | Content                                                                                                                                   |

#### Social Media

A social media plan has been elaborated for the project, and is available as Annex 2.

TAILOR channels

- LinkedIn: <u>https://www.linkedin.com/company/tailor-network-of-excellence-</u> centres-on-trustworthy-ai
- **Twitter**: TAILOR EU Network (@eu\_tailor)

• **Youtube**: TAILOR has a Youtube channel solely intended for hosting videos produced within the project. It will not be used for active promotion of the project.

#### Other channels

Additional dissemination will be done through VISION, CLAIRE, Al4Media, HumaneAI, AIDA and TAILOR partner social media channels, as appropriate. Especially CLAIRE has a well-established social following.

Figure 4. TAILOR YouTube channel Homepage

#### Press releases

Press releases will be issued by the communication team, and translated into the national languages by other TAILOR partners.

#### Impact stories

The TAILOR Impact Stories is a powerful demonstration of the collective achievements and spirit of the TAILOR network. These nine distinct narratives highlight unique protagonists who have contributed to the overarching TAILOR story. More than just accounts of scientific endeavours, they are vibrant illustrations of the human spirit, innovation, and cooperation that have driven the project forward. The Impact stories will be published as a printed booklet, a digital version and as separate web pages. All will be promoted on social media.

#### Newsletter

The TAILOR newsletter is sent regularly once a month. The newsletter's objectives are:

- to announce initiatives and events,
- to keep people involved in TAILOR project updated,

- to spread and disseminate both academic and public initiatives coming from TAILOR members or other ICT-48 projects,
- and to foster communication among partners.

There are 2 modalities in which people can receive the TAILOR newsletter, either as part of the TAILOR mailing lists managed by the project office, or by subscribing online on the TAILOR website.

#### Brand manual, video, flyer and templates

The Dissemination and Communication materials (D 12.2) have been developed under the supervision of University of Bologna (see **Appendix A - Brand Manual**). These materials include:

- The general image of TAILOR project (Logo, colours, graphical elements, font, banner for website and social networks);
- Dissemination materials (flyer, poster, presentation video);
- Microsoft Word and Microsoft PowerPoint Templates (available on the TAILOR website for download on the "Logo" section).

#### Conferences and journal

TAILOR will organize a conference every year. It is meant to be an external conference involving a broader audience than just the project partners. However, for the first years, the executive board has decided the conference will be an internal one for the contingent situation of the covid-19 pandemics.

Every external conference in which the TAILOR project publishes its results (or is associated with a publication) will be stored on the conference web site. TAILOR will target AI conferences such as IJCAI, ECAI in Europe, AAAI in the USA, PRICAI in Asia, plus major conferences on specific AI areas of reasoning, machine learning and optimization, such as NeurIPS, ICML, ICLR, KR, ECML, AAMAS, ICAPS, UAI, ICLP or CP, ACM-FAT.

The publication strategy will be also aimed at well-known scientific and industrial journals, magazines, newspapers (e.g. AIJ, JAIR, Neural Computation, Journal of Machine Learning, IEEE Transactions on Pattern Analysis and Machine Intelligence, amongst others) as well as at open access journals.

#### AIOD: the Trustworthy AI Repository

The research, networking, and connectivity activities of the TAILOR network will produce assets that will provide great value for the AI community. To ensure availability, these assets will be integrated with and built upon the AI-on-demand platform AI4EU. Coordination and promotion of these tasks are part of WP11 and described in WP11 reports.

While it is possible to integrate a variety of assets such as case studies and documents, currently, efforts are concentrated on News and Events, AI Assets and Research Bundles, Open Calls and Courses. All major TAILOR news, events, courses and calls will be published on the AI4EU platform by the communication team. The communication team will also assist WP11 in promoting the use of the AI4EU platform.

## Major communication campaigns

Scientific papers and other contributions

For five major AI conferences (IJCAI-ECAI, AAMAS, Neurips, AAAI, ICML), a list of accepted contributions will be compiled and promoted on the website, social media and, if possible, at the venue of the conference, as follows:

- 1. Email to collect info within the TAILOR network ("Who has an accepted paper?")
- 2. Social media post "The following 4-5 papers have been accepted. Did we miss any?"
- 3. Complete list published as news on TAILOR website, newsletter and associated social media posts
- 4. Promotion of the TAILOR list of accepted papers at venue (if possible)
- 5. "Live" reporting from conference with pictures from TAILOR talks or workshops

#### Roadmap

The SRIR is a major outcome from the project. It will be issued in two versions. For each version, the following material will be produced:

- A "one-pager" short version
- A public version, with specific layout
- An illustration for web and social media
- A press release
- An opinion piece

#### Handbook

The Handbook on Trustworthy AI will be promoted using social media, the website and other outlets as suited:

https://prafra.github.io/jupyter-book-TAILOR-D3.2/TAILOR.html

#### Challenges and hackatons

During the course of the project, challenges (competitions, benchmarks, hackathons) will be proposed by TAILOR members. At least one academic challenge and one challenge related to an industrial use case should be run each year during TAILOR existence.

For each challenge, the following communications will be prepared:

- Call for proposals (website, social media, newsletter, email)
- Results (website, social media, newsletter)

#### Connectivity fund

The Connectivity Fund is an important instrument for the project. It is open for proposal submission 4 times/year. The fund is expecting about 100 awardees. For each submission round, the following communications will be issued:

- Call for proposals (website, social media, newsletter, email)
- Results (website, social media, newsletter)
- Presentation of each awardee (web, social media)

#### TAILOR conference

The TAILOR conference is a yearly event mainly for the network. The event will be promoted on the website, in newsletters and using social media.

#### TAILOR summer school

The TAILOR summer school is a yearly event for young scientists. The event will be promoted on the website, in newsletters and using social media.

## Preliminary list of activities 2023-2024

#### Table 5. Planned activities

| Communication/<br>message              | Audience                                                    | Format                                                                       | Schedule       | Responsibility                                                          |

## **Scientific Publication Strategy**

TAILOR will publish its results under open access, that refers to the practice of providing online access to scientific information that is free of charge to the end-user and reusable.

With scientific information we refer to peer-reviewed scientific publications relating to project results (journal papers, conference papers etc.) and research data (data

underlying publications, curated and raw data).

In particular, all peer-reviewed scientific publications related to project results must be published in Green or Gold Open Access and deposited with an Open Licence in a publication repository. Open Access and deposit is also recommended for books, conference proceedings and technical reports. For datasets, they must be deposited together or linked with the corresponding journal article in the selected data repository with an Open Licence as indicated in the Data Management Plan.

## **Evaluation and Monitoring of TAILOR Dissemination Activities**

Liaisons, Participation in Fora & Thematic Events, Stakeholder Engagement Workshops

Schedule

M1-M12:

Detailed contact plan towards relevant fora and projects

Organization of stakeholder engagement workshops

Participation in thematic events

Participation or membership with standardization bodies

Participation or membership with industrial associations

M13-M36:

Organization of stakeholder engagement workshops

Participation in thematic events

Establish contacts and liaise with relevant Fora

Establish first contacts with European projects

Maintain contacts with previously contacted entities

| Monitoring Indicators                             | M28 | M48 |

## **Obligations and Requirements for Communication Actions**

# Information on EU funding — Obligation and right to use the EU emblem

Unless the Agency requests or agrees otherwise or unless it is impossible, any dissemination material on any media must indicate that the project received funding from the European Union's H2020 programme.

In particular, it should display the European Union flag,

TAILOR is an ICT-48 Network of AI Research Excellence Centers funded by EU Horizon 2020 research and innovation programme GA No 952215

and the acknowledgement of funding:

• For communication activities:

"TAILOR is an ICT-48 Network of AI Research Excellence Centers funded by EU Horizon 2020 research and innovation programme under grant agreement No 952215".

• For infrastructure, equipment and major results:

"This [infrastructure][equipment] [insert type of result] is part of the TAILOR project that has received funding from the EU Horizon 2020 research and innovation programme under grant agreement No 952215".

More about how to acknowledge is found here: https://ec.europa.eu/research/participants/docs/h2020-funding-guide/grants/grantmanagement/acknowledge-funding\_en.htm

When displayed together with another logo, the EU emblem must have appropriate prominence. For the purposes of their obligations under this Article, the beneficiaries may use the EU emblem without first obtaining approval from the Agency.

For more detailed information, see <u>https://ec.europa.eu/info/sites/info/files/use-emblem\_en.pdf</u>

## Appendix B – Social media plan

#### Miscellanous

Social media policy

The TAILOR communication team will follow guidelines and rules defined in Linköping University Social Media policy:

https://insidan.liu.se/kommunikationsstod/sociala-medier-2/riklinjer-ochpolicy/1.453222/Riktlinjer\_sociala\_medier\_vid\_LiU.pdf

Ownership and Responsibilities

The Lead Partner of the TAILOR project owns all social media profiles. The Coordinator for the TAILOR project (as defined in the Grants Agreement) represent the lead partner organization and will be given super-administrator access to all accounts.

The TAILOR Communications Director, under supervision by the Coordinator, is responsible for creating posts, curating content and replying to comments. The Communications Officer(s) assists as needed.

New post will be sent to the Coordinator a few hours before publishing.

#### Archives

Due to Swedish law (Arkivlagen), social media posts cannot be erased. If the posts must be removed, this can be done by unpublishing or by saving a local copy in the diarie at LiU.

#### Monitoring

Activity on social media accounts should be monitored, automatically by setting alerts and manually at least once/week. Unsuitable comments should be removed.

Checklist for a successful post/tweet! What's in it for me? Write something the audience needs. Nice image/video/link Mention people using their LinkedIn profile/Twitter handle! Use hash-tags such as: #trustworthyAI #socialAI #machinelearning

LinkedIn

TAILOR has a company page that is administered by the project office. The account is not linked to another account.

Profile information Namn TAILOR Network project Public LinkedIn-url <u>https://www.linkedin.com/company/tailor-network-of-excellence-centres-on-trustworthy-ai</u>

Catch-phrase

A Network of European research centres on the foundations of Trustworthy AI, integrating learning, reasoning and optimisation.

Language

English (preferentially British)

Overview

Funded under the European Union's Horizon 2020 research and innovation programme, the TAILOR project is building a network of excellence centres on the foundations of Trustworthy AI. We are committed to demonstrate that research and innovation based on expertise, cooperation, and diversity can achieve the European vision of Human-Centred Trustworthy AI and make Europe the global role-model for responsible AI. The project started 1st September 2020 and will run for 4 years. Follow us:
